

Verification of WSL Installation

A screenshot of a Windows Command Prompt window. The title bar says "Command Prompt". The text inside shows the Windows version (10.0.26200.8973) and copyright information. The user 'sindh' runs the command 'wsl --status'. The output indicates that the default distribution is Ubuntu, the default version is 2, and WSL1 is not supported. It advises enabling the "Windows Subsystem for Linux" optional component to use WSL1. The prompt ends with 'C:\Users\sindh>'.

```
Microsoft Windows [Version 10.0.26200.8973]
(c) Microsoft Corporation. All rights reserved.

C:\Users\sindh>wsl --status
Default Distribution: Ubuntu
Default Version: 2
WSL1 is not supported with your current machine configuration.
Please enable the "Windows Subsystem for Linux" optional component to use WSL1.

C:\Users\sindh>
```

Verification for gcc version

A screenshot of a terminal window. The title bar shows 'sindhuja@SINDHUJA: ~'. The user runs the command 'gcc --version'. The output shows the gcc version (13.3.0) and copyright information for the Free Software Foundation, Inc. The prompt ends with 'sindhuja@SINDHUJA:~\$'.

```
sindhuja@SINDHUJA:~$ gcc --version
gcc (Ubuntu 13.3.0-6ubuntu2~24.04.1) 13.3.0
Copyright (C) 2023 Free Software Foundation, Inc.
This is free software; see the source for copying conditions. There is NO
